Certified Salesforce Developer and Software Engineer with 5+ years of experience building enterprise solutions across insurance and financial services. Experienced technical lead with a strong background in Salesforce, Python, AWS, REST APIs, integrations, and AI. Skilled in leading development teams, providing technical guidance and code reviews, modernizing platforms, automating workflows, and building scalable cloud solutions.

TECHNICAL SKILLS

Languages: Apex, Python, Java, React, TypeScript

Salesforce: Sales/Service/Experience/Financial Services Clouds, Omnistudio, Mulesoft, Agentforce, CPQ, Flows, LWC

Integration & Cloud: REST API, SOAP API, FastAPI, AWS (ECS, S3, Lambda, Bedrock), SQL

Tools: Git, Salesforce CLI, Postman, VS Code, Jira, Azure DevOps, Claude, Copilot, Salesforce Inspector, Data Loader, Conga

PROFESSIONAL EXPERIENCE

Senior Salesforce Developer — *Reliance Matrix*

June 2025 – Current

- Delivered Salesforce solutions across Service and Experience Clouds supporting national insurance operations.
- Led and mentored a team of 10 developers, providing technical guidance, code reviews, and support across development projects.
- Migrated deployments from Change Sets to CI/CD using custom Github workflows, automating releases across environments.
- Built Salesforce Member Hub integration to unify member identity and securely transmit approved claims payments via REST API to Citi Bank.
- Developed the Salesforce-Ushur integration using REST API to classify claim documents and apply structured case metadata.
- Maintained and extended enterprise applications (Typescript, Java, Python) through development, bug fixes and refactoring.
- Architected an LLM-powered analytics platform natively within Salesforce, integrating AWS Bedrock to perform real-time sentiment, risk, and category classification.
- Leveraged Claude and GitHub Copilot to accelerate development velocity, using AI pair-programming for code generation, debugging, and refactoring across Python and Salesforce codebase.

Senior Salesforce Developer — *Macquarie*

Aug 2021 – June 2025

- Delivered Salesforce enhancements across six orgs in the Sales and Financial Services Clouds supporting asset management.
- Led legacy org uplift to Financial Services Cloud and used Omnistudio to modernize workflows and improve scalability.
- Migrated 300,000+ records across Salesforce schema/objects to support Financial Services Cloud transition.
- Collaborated with stakeholders to gather and analyze requirements, translating them into Salesforce solutions.
- Designed and developed Salesforce Agentforce agents to automate financial services workflows.
- Built and maintained Conga and CPQ workflows, extending pricing, approval, and contract processes.
- Built a Python data pipeline to import product data into Salesforce, cutting 30+ hours of manual work monthly.
- Maintained MuleSoft integrations between Salesforce and downstream platforms for a unified attribution workflow.
- Upgraded locally ran processes to AWS workflows to transition to horizontally scaling cloud architecture.

PROJECTS

Salesforce Document Downloader

- Built a Python service to pull employee and document data via high-volume REST calls, with retry and pagination handling.
- Engineered a streaming download pipeline with payload validation and rate-limit/timeout handling.
- Converted the solution to a platform event-driven architecture triggering an AWS-hosted service for async processing.

Salesforce toolkit

- Designed and built a Python CLI toolkit wrapping the Salesforce CLI to automate test data provisioning, reusable Apex script execution, and cross-org metadata comparison for Salesforce development workflows.
- Created org-comparison tool that diffs metadata between environments to detect deployment conflicts before they occur, addressing recurring merge conflicts caused by high-frequency third-party changes to a shared QA org.

EDUCATION & CERTIFICATIONS

B.S. in Software Engineering, Minor in Criminal Justice — Shippensburg University, ABET Accredited, May 2021

Salesforce Certified Platform Developer I
